

### Basic Uses & Description:

**RP-110 Mineral Spirits** is a medium boiling aliphatic solvent designed specifically for silicone roof coatings. This product is a dual purpose solvent as it can act as a thinning agent for silicone as well as a cleaning solvent for silicone spray equipment.

**Features:**

- Medium-boiling aliphatic solvent tailored for silicone roof coatings.
- Dual-purpose: used as a thinning agent for silicone products and as a cleaning solvent for tools and spray equipment.
- Supports proper flow characteristics of high-solids silicone coatings when thinning is necessary.

### Application:

**THINNING:**

For easier spray application, mix no more than 10% by volume of the Mineral Spirits to the silicone coating. Be aware that the more mineral spirits that you mix into the silicone product, the less millage per gallon you will yield.

**FLUSHING THE PUMP:**

For every 250' of hose, you should flush your pump and hoses with 15 gallons of mineral spirits. Leave the clean mineral spirits in the pump and hoses after the flush in order not to introduce air into the system.

### Storage & Handling:

Mineral Spirits is good for up to 3 years from the manufactured date. When storing Mineral Spirits, keep all packages closed and kept in a cool, dry place. Make sure there is adequate explosion-proof ventilation in all storage areas. Store Mineral Spirits away from heat, sparks, and open flames. Ground all equipment near the Mineral Spirits storage area to prevent accumulation of static charge.

### Packaging Sizes:

**RP-110 Mineral Spirits** is available in 5 gallon containers.

TEST PROPERTY	TEST VALUE
Flash Point	106° F
Viscosity at 68° F	1.3 mm <sup>2</sup> /s
Weight per Gallon	10 lbs/gal
VOC Content	<770 g/L
Color	Clear
Aromatic Content	300 UV
Density at 59° F	770-810 kg/m <sup>3</sup>
Saybolt Color	+30
Benzene Content	<1 ppm
K.B. Index	30-38 KB
Initial Point	302° F
Dry Point	401° F
