Modified Bitumen Roofing Systems

COMPETENT. COMPETITIVE. KOOLCOATS.

POLYMER-COATED • REFLECTIVE ULTRA-WHITE MEMBRANE

- Meets most cool roof specifications with a Solar Reflectance Index (SRI) of 96 (initial) and 83 (3-year weathered)
- Proven to maintain excellent reflectivity over time
- Outstanding granule retention with only 0.09 g loss, compared to
- ASTM maximum of 2.0 g
- Koolcoats technology enables quicker and stronger seams without granules
- Granule-free selvage edge for added convenience and aesthetics

100% WATERPROOF • FULLY ADHERED SBS SANDED PRE-FAB MEMBRANE

- Quick installation
- Product controlled, consistent thickness and quality.
- Assembled with polyester cloth, high resistance & elongation value
- Accommodates thermal differences with no cracking or splitting. Excellent adhesion, cohesion, moisture resistance and weathering.
- Can be subjected to occasional pedestrian traffic.

100% WATERPROOF • FULLY ADHERED APP TORCH-DOWN MEMBRANE

- Fully adhered, quickly covering large roof areas
- Manufacturer controlled with consistent thickness and quality
- High elongation value
- Impactful reflectivity

PREFABRICATED SBS SELF-ADHESIVE MEMBRANE

- Excellent adhesion and product performance
- Low temp flexibility.
- Self-adhered membrane for safe applications where using a gas torch is undesirable or prohibited.

- **100% Waterproof System**
- **High Flexibility and Impact Resistance**
- **Environmentally Friendly**
- **Significant Thermal Stability**
- **Excellent Adherence**
- **Resistant to Discoloration and Scuffing**
