- 10 YEAR WARRANTY
- PREVENTS LEAKS

WHAT IS PRO TIER 10 SILICONIZED?

ProTier 10 is a flexible white acrylic roof coating that expands and contracts with the roof's movement, the product resists cracking and peeling. This coating is a barrier against water and reflects the sun's heat and UV rays leading a reduction of interior temperatures Siliconized with Silicon Plus Technology for enhancing properties.

- High elongation to withstand movement.
- Easy to apply.
- Highly reflective with exclusive UV Shield to preserve
- Environmentally friendly.
- Gives points for LEED certification
- Resistant to common structural movement
- Resistant to fungi contamination
